Homework #1

In this homework you will be expanding on Lesson 1, Hello World. Your task is to write a simple program that, when run, writes three short sentences about your favorite activity. Below, you can see the output from my favorite activity.

```
My favorite activity is fishing.
I like to go fishing in the ocean, where the fish are really big.
Usually I don't catch any fish.
```

What's your favorite activity? Follow the instructions from Lesson 1 for creating a project and call it "Homework1". You might find replacing "print" with "println" to be useful.
